

SANDLEEN SETHI

IT Specialist | Data & Digital Solutions

+92 324 5674623 | sandleensethi09@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

IT-focused professional with hands-on experience in SQL, Python, Excel, and Power BI, supporting technology and digital-solutions work through data cleaning, systems-based analysis, and dashboard/reporting tools. Comfortable working across digital platforms and translating technical output into clear, actionable insights for teams and stakeholders.

SKILLS

- **Programming & Querying:** SQL (Joins, CTEs, Window Functions, Subqueries), Python (Pandas, NumPy, Matplotlib, Seaborn)
- **Analytics & Statistics:** EDA, Data Cleaning, KPI Reporting, Descriptive Statistics, Hypothesis Testing, Regression Analysis, Predictive Modeling
- **Visualization & BI:** Power BI, Tableau, Excel, Power Query, Dashboard Development
- **Business & Communication:** Data Storytelling, Stakeholder Communication, Insight Presentation, Problem Solving

EXPERIENCE

Data Analyst Intern | *Excelerate (Remote)* Aug 2026 – Sep 2026

- Completed a 4-week Data Analytics internship with Excelerate, working as part of a 6-member team on the RIT Learner Participation Analysis project.
- Examined 8,558 learner applications across 5 opportunity categories, revealing that a declining participation rate was driven by category-mix shift, not quality decline.
- Led **feature importance analysis** across 3 predictive models (Gradient Boosting, Random Forest, Logistic Regression — 91.3% accuracy), identifying opportunity category as the dominant predictor (60% model weight).
- Authored 8 actionable recommendations (4 on resource allocation, 4 on promotion strategy) presented to program stakeholders.

Data Analyst Intern | *SoulVibeTech (Remote)* Jul 2025 – Sep 2025

- Built a Power BI dashboard analyzing 10,000+ farm records across 4 crop types, tracking market price, seasonal pricing trends, consumer trend index, and estimated production cost (~\$30M total across crops).
- Delivered a 6-question Q&A-format insights report highlighting Rice and Soybean as the most price-stable crops and Wheat/Corn as most seasonally volatile, while flagging data gaps (district, advisor, and farmer-level detail) needed for deeper profitability analysis.

PROJECTS

RIT Learner Participation Analysis | *Python, Predictive Modeling, Stakeholder Reporting*

- Cleaned and explored 8,558 sign-up records across 5 categories in Python, tracing a declining participation trend to a category-mix shift rather than a quality issue.
- Compared 3 classification algorithms (Gradient Boosting, Random Forest, Logistic Regression), reaching up to 91.3% accuracy and a 0.97 ROC-AUC; pinpointed opportunity category as the single largest driver of participation (60% feature weight).
- Translated technical findings into 8 stakeholder-ready recommendations spanning resource allocation and promotion strategy.

Supply Chain Optimization & Profitability Analysis | *Python, SQL, Power BI, Excel*

- Investigated 66K+ orders to uncover profitability, customer, and supply chain trends.
- Built a Power BI dashboard tracking \$36.78M revenue and 10.78% profit margin with business insights.

Airline Delay & Performance Analytics | *Python, SQL, Power BI*

- Reviewed 5M+ flight records to assess delays, airline performance, and route efficiency.
- Developed a Power BI dashboard tracking KPIs, delay patterns, and operational bottlenecks.

Quasi A/B Testing for Digital Payment Fraud Analysis | *Python, Tableau, Statistics*

- Performed quasi-experimental analysis on 1M+ payment transactions to assess fraud risk across digital payment methods.
- Applied hypothesis testing and EDA to uncover transaction risk factors.

EDUCATION

Bachelor of Science in Information Technology | *University of the Punjab, Gujranwala, Pakistan* 2023 – Present (Expected 2027)

CERTIFICATIONS

- Google Advanced Data Analytics Professional Certificate — Coursera, 2025
